DETAILED ACTION

Election/Restrictions

1. The applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):
 - A. The embodiment measuring distance.
 - B. The embodiment measuring velocity.
 - C. The embodiment measuring reflectivity.
2. Upon election of invention A, B or C, the applicant is further required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):
 - a. Embodiment using binary signal.
 - b. Embodiment using electromagnetic energy.
 - c. Embodiment using acoustic energy.
 - d. Embodiment using a coherent burst.
3. Upon election of invention a, b c, or d the applicant is further required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):
 - i. Wherein the received signal is focused.

ii. Wherein the received signal is amplified and filtered.

4. Upon election of invention i or ii, the applicant is further required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

(1) Wherein the sampled signal's amplitude is adjusted.

(2) Wherein the sample signal is converted to a digital signal.

5. Upon election of invention (1), or (2) the applicant is further required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

AA. Wherein a coarse determination of the parameter is determined.

BB. Wherein a baseline phase offset of the parameter is determined.

6. Upon election of the species identified above (paragraphs 1 through 5), the applicant is further required to elect a single species of the following under 35 USC 121

for the purpose of examination. This additional requirement is to facilitate examining due to the broad range of signal transmission.

aa. Transmission of the signal with code.

bb. Transmission of the signal with ramp voltage.

cc. Transmission of signal that substantially covers the target.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement (e.g., I, A, a, i, (1), AA, aa, bb, and cc), listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
